### SURFACE TB – HARD SURFACE DISINFECTANT

The 2019 novel coronavirus (Wuhan like 2019-nCoV) has caused the recent outbreak of respiratory illnesses first detected in Wuhan City, China and continues to expand globally. CDC has been emphasizing the importance of hygiene practices including properly disinfecting surfaces and frequent hand washes for infection prevention control measures.

Surface TB has demonstrated effectiveness against viruses similar to coronavirus-Wuhan on hard non-porous surfaces. Therefore, Surface TB can be used against coronavirus-Wuhan when used in accordance with the directions. Refer to the CDC website at <https://www.cdc.gov/coronavirus/index.html> for additional information.

## MOORING Construction + Restoration
